SEO READINESS

The opportunity in one page

Acme Advisory has a credible market proposition and a practical path to unlock meaningful capacity without adding proportional headcount. The audit identifies a near-term automation portfolio worth approximately \$46K per month across cost savings and growth upside. The first 30 days should focus on lead response, qualification, and support deflection—high-visibility wins that create the data foundation for deeper operational automation.

Business context

Acme Advisory presents as a specialist services company with a strong consultative proposition. Its clearest growth lever is turning existing expertise into faster, more consistent digital journeys—from first website visit through qualification, delivery, and expansion.

BUSINESS MODEL

Website & search readiness

KEY FINDINGS

- Search intent is under-served** HIGH IMPACT

Core pages explain capabilities but do not capture enough problem-aware and comparison-stage demand.
- Metadata needs sharper differentiation** MEDIUM IMPACT

Several title and description patterns could communicate outcomes and geography more clearly.
- Internal linking is shallow** MEDIUM IMPACT

Service, proof, and educational content are not connected into strong topical clusters.
- Conversion proof arrives late** HIGH IMPACT

Trust signals and quantified outcomes should appear earlier on commercial pages.

Recommended AI roadmap

30 DAYS

Capture the quick wins

- Launch lead qualification and routing
- Instrument conversion events and response SLAs
- Create the approved knowledge base

60 DAYS

Connect the revenue engine

- Automate nurture and proposal workflows
- Unify CRM lifecycle data
- Deploy weekly performance intelligence

90 DAYS

Scale the operating system

- Orchestrate onboarding and delivery handoffs
- Launch internal knowledge assistant
- Measure ROI and prioritize the second wave

Final recommendation

Fund the first wave against measurable baselines: response time, conversion, workflow hours, and customer satisfaction. Keep human approval at consequential decisions, review exceptions weekly, and expand only after adoption and value are visible in the operating data.
